

A fusion of machining and friction stir welding technologies

VTC-530/20 FSW

Yamazaki Mazak is unveiling a new hybrid multi-tasking machine, the VTC-530/20 FSW with advanced machining technology. FSW (**F**ric**S**tion **S**tir **W**elding) agitates materials which are softened by the heat of abrasion. Since the VTC-530/20 FSW is based on a vertical machining center, all processes —welding and machining, can be performed in the same machine.

Sales of the VTC-530/20 FSW will start at JIMTOF2014 on October 30, together with another hybrid multi-tasking machine, the INTEGREXi-400 AM.

Mazak hybrid multi-tasking machines provide a fusion of machining technology and today's advanced technology.
