

High speed, High accuracy vertical turning lathes MEGATURN SMART series

Yamazaki Mazak Corporation (President: Tomohisa Yamazaki, Address: Oguchi-cho, Niwa-gun, Aichi-pref.) has announced the start of sales of the MEGATURN SMART series.

The MEGATURN SMART series of vertical turning lathes is designed to provide high-productivity, compact floor space requirements and exceptional value. Two sizes are available. The MEGATURN SMART 500 has a maximum turning diameter of 500mm and the MEGATURN SMART 600 has a maximum turning diameter of 600mm. Both are available with rotary tools mounted on the turret as well as a mirror-image version to facilitate factory floor layouts.

All are equipped with a rigid, integral spindle/motor to ensure high-productivity as well as high accuracy machining. Roller liner guides are utilized to provide the rigidity for heavy-duty machining. An automatic tool changer and separate tool magazine for boring bars are optionally available. Its use eliminates tool interference that is frequently encountered when multiple boring bars are mounted on a VTL turret.

The standard equipment MAZATOROL SMART CNC system provides unsurpassed conversational programming as well as ease of operation.
