Mazak Credit Corporation arranges leases and loans for Mazak machines, and will structure attractive lease and loan structures to help you buy the machine that you are currently considering, and more Mazaks in the future – we have your long term success in mind.

Currently the leasing industry prices and structures lease and loan transactions based on your company’s credit strength. In order for Mazak to arrange the best lease or loan structure for you, please obtain a credit application from the people listed below or at www.mazakusa.com/financing/ complete it online, send it via email, courier, mail, or fax it to Mazak at (859) 342-1502, along with two years of financial statements and any interim statement you may have. Naturally, there will be exceptions to this request for newer companies and for large companies. In some instances, we can arrange financing with only a credit application. (Tax returns may be submitted for companies that do not prepare other financial statements.)

In addition, we interview you to learn your specific objectives for the lease or loan, and to discuss the financial data requested.

The leases that we arrange normally only secure the particular machine being financed or leased, vs. all of your assets as bank financings usually do. The financings can be structured so that your monthly payments are in Canadian Funds or U.S. Funds. U.S. Funds transactions are attractive for two reasons: normally they have lower rates and payments, and they have no foreign exchange payment adjustment at loan/lease inception.

Loans and leases are typically 5-years in length, but can range from 3 to 7 years, depending on credit strength.

You could apply all or part of your machine deposit as a down payment on a loan or advance rentals under a lease. Alternatively, any machine deposit not required under a financing structure or for GST/PST, could be refunded to you after you accept the machine and the financing commences.

All financings will be subject to credit approval by Mazak Credit Corporation and/or its assignees. Machine acceptance must be within 90 days of credit approval, or a reapproval may be required, which is typically easily accomplished.

For questions or requests, fax to (859) 342-1502, email mccgroup@mazakcorp.com, or you can contact us at our main number: (859) 342-1311.
