CUSTOMER SUPPORT

With the festive holidays fast approaching, I am delighted to look back on 2017 as a landmark year for Mazak in the UK. Not only did the company celebrate its 30th anniversary of UK Manufacturing operations, but it also emerged as a record year for machine orders. This would not have been possible without the continued support from all our valued customers, partners and colleagues, so on behalf of all at Yamazaki Mazak UK Limited may I wish you a very Happy Christmas and a prosperous 2018.

Alan Mucklow,
Managing Director UK and Ireland, Sales Division

Our Vertical Machining Centres serve the full spectrum of industries, from subcontract to aerospace.

The VCN-430A, VCN-530C and VTC-530C offer all the benefits you'd expect of Mazak ownership including; application support, aftersales service and the world's fastest CNC. These machines deliver high quality precision parts quickly, reliably and competitively – all at an affordable price.

SIEMENS

MAZAK FEATURING
SIEMENS TECHNOLOGY

Mazak have worked closely with Siemens to fully integrate the Siemens SINUMERIK control onto a range of Mazak machine tools for users who have standardised on Siemens control and want to continue with a single solution.

The **Siemens 840D sl** is a premium industrial standard CNC control. Combined with the build quality synonymous with Mazak, the integration of Siemens control extends Mazak machine capability to a wider market sector – allowing users to realise the benefits of using Mazak machines without having to incorporate a new operator interface into their operations.

Following standard Siemens protocol, operators can confidently transfer from other Siemens-controlled machines to Mazak machines with Siemens control.
