

“Mazak Solution Partners” Stronger solutions through collaboration

Yamazaki Mazak Corporation has announced “Mazak Solution Partners” that feature collaboration with robot manufacturers and software companies to realize stronger solutions to the challenges that manufacturers are facing today.

The shortage of skilled employees and the increasing demands for higher efficiency in the machining of a wide variety of workpieces in small lot sizes due to the wider diversification of customer demands are significant factors in the large interest in smart factories over the last few years.

In response to these requirements of today’s environment, Yamazaki Mazak has strengthened its collaboration with robot manufacturers and software companies. Thanks to our machine tool interface which is open to companies who are collaborating with us, we can coordinate integrated automation systems utilizing robots which meet each customer’s requirement and synchronize data with software for easier preparation on office PCs easier. By doing so, smart factories will be even more advanced to realize higher productivity.

At the European International Machine Tool Exhibition (EMO Hannover 2019) held in Hanover, Germany this September, demonstrations of the collaboration with our partners were exhibited using the new “INTEGREX i-450H ST” and “VARIAXIS C-600”.
